NDS Systems Announces New Client

Clearwater, FL

December 11, 2012

NDS Systems, a Clearwater-based computer software firm, is pleased to announce JEDA Polymers, LLC as its newest ERP software client.

Based in Romeoville, IL, Jeda Polymers is a privately-owned distributor and compounder of engineering-grade thermoplastic resins. Their specialties are nylon, PBT and acetal.

Realizing that Quickbooks and Excel could no longer accommodate their increasing business demands, Jeda Polymers chose the NDS ERP solution because of its robust capabilities and previous relationship. Features such as better inventory control, in particular lot and serial control and inventory cycle counting, made the NDS ERP solution the answer for their needs.

Implementation of the NDS ERP product commenced in the beginning of November, with a go live date tentatively scheduled for late February or early March.

About NDS Systems

In business since 1985, NDS Systems (www.ndsapps.com) is a leading provider of enterprise-class ERP systems and applications designed for small-to-medium businesses in the distribution, manufacturing, fulfillment and financial services industries.
