NDS Systems Announces New Client

Clearwater, FL

February 23, 2010

NDS Systems, a Clearwater-based computer software firm, is pleased to announce CDI Media as its newest client.

Based in Salt Lake City, Utah, CDI Media offers a variety of duplication and replication services for CD, DVD, VHS and digital business cards. They are also one of the few organizations that offer complete creative, production and fulfillment services.

In business since 1982, CDI Media has since grown to become one of the nation's largest duplication centers. Such success has made them part of a select group of replication companies that are ISO 9001:2000 certified.

Realizing the fulfillment system they had could no longer accommodate their increasing business demands, CDI Media chose the NDS ERP solution because of its robust capabilities. Features such as better inventory control, in particular lot and serial control and better cycle count, made the NDS ERP solution the answer to for their fulfillment division needs.

Implementation of the NDS ERP product commenced in the beginning of February, with a go live date tentatively scheduled for late March or early April.

About NDS Systems

In business since 1985, NDS Systems (www.ndsapps.com) is a leading provider of enterprise-class ERP systems and applications designed for small-to-medium businesses in the distribution, manufacturing, fulfillment and financial services industries.
