NDS Systems Announces Strategic Partnership

Clearwater, FL

June 23, 2010

Tampa, FL - June 23, 2010 – NDS Systems, LC, a developer of enterprise resource planning (ERP) software, is pleased to announce a strategic partnership with WorldView Ltd. The partnership features direct integration that links up the two systems, thereby maximizing the efficiency of data sharing between what traditionally would be two disparate software solutions.

The NDS ERP software solution boasts direct integration with the WorldView electronic document management system through a series of “Docpop” buttons. Docpop allows instant access to business-critical documents, drawings, and more through a single click in the NDS ERP solution. This secure document link saves much of the time and effort involved in searching for, retrieving, and filing important documentation.

In addition to Docpop, NDS Systems users have the opportunity to utilize advanced WorldView functionality such as Workflow, Electronic Forms, and more. Features such as Workflow can automate redundant document centric business processes, resulting in increased productivity, accuracy, and efficiency of day-to-day operations within an organization. Enterprise Content Management also assists in the facilitation of regulatory compliance initiatives and supports vital disaster recovery functions.

“ We feel that the additional capabilities of the WorldView suite, across our ERP as well as our Asset Based Lending applications, will provide our clients with a tremendous benefit in productivity and accurate information storage and access”, said Thomas J. Ciurej, NDS Chief Operating Officer. “This strategic alignment brings far more capability to our software applications faster, better, and with less cost than we could hope to have developed internally. We are looking forward to a mutually beneficial relationship.”

About NDS Systems, LLC.

Founded in 1985, NDS Systems, LC is a leading provider of enterprise-class ERP systems and applications that are specifically designed for small to mid-sized organizations in the distribution, manufacturing, fulfillment and financial services industries.
